

Serial Nr.: 10/672,352  
Art Unit: 2838

03207-URS

AMENDMENTS TO THE CLAIMS:

1. (Currently Amended) A power supply device disposed in an electronic device having a main power supply, the power supply device comprising:  
a voltage converting unit[[,]] for converting [[a]] an input voltage adapted to be output from the main power supply of the electronic device according to a converting command so as to generate a voltage status;  
a power controlling unit[[,]] for receiving ~~controlling~~ an output from the voltage converting unit [[to be]] to generate a status of power supply [[by]] according to a control command when the electronic device is ~~adapted to be~~ shut down;  
a switch connecting to the power controlling unit for providing the control command to the power controlling unit; and  
a USB interface unit receiving an output from the power controlling unit and connecting for connection to a peripheral unit ~~and adapted~~ to output electric power from the main power supply to the peripheral unit based on the status of [[the]] power supply.
2. (Original) The power supply device as claimed in Claim 1 further comprising a voltage converter that gives the converting command to the voltage-converting unit.
3. (Cancelled).
4. (Currently Amended) The power supply device as claimed in Claim 1 further comprising a power output indicator indicating the status of [[the]] power supply via the USB interface unit based on the status of power supply and the voltage status.
